ADD/ADHD Field Expert Songwriter Wei Chi Teacher/Healer

Over the last thirty years, Dr. Kevin has been an innovator in both the business and private sectors. He introduced the importance of formalized training for all levels of employees, and implemented formalized training systems in diverse industries such as hospitality, financial services, retail, and education. He also created communication programs and critical thinking based management development programs in the personal growth, human potential, and alternative health fields. He was one of the first to introduce coaching into his practice, fusing it together with the more traditional approach of counseling to leverage the benefits of both in his unique practical approach. He now works as a synergetic & spiritual catalyst. He is familiar with both Eastern and Western philosophies and healing systems and has assimilated elements from both into his methods.

Born into a family of healers and psychically gifted individuals, Dr Kevin, was talked to about his psychic abilities at the age of four and started doing professional psychic work as a teen-ager, as a way to make money to go to college. Using his natural gifts and talents, he often described that being psychic to him was like being blond or blue eyed- it was just one of the things that he was. His time doing paranormal activities, in his teens and twenties, was in fact, for him quite normal. This part of his life took a back seat as he got his degrees in business while building his professional /business career. His professional/corporate career as trainer, troubleshooter, and manager lasted from 1978-1990.

For the last 26 years, Dr Kevin, has been bridging the gaps between business and human potential done through a spiritual lens. As a spiritual catalyst he has created and taught over a hundred different class, course and programs, throughout the US and internationally, as well. These classes have spanned professional and personal development to business and spiritual development.

Throughout his career, Dr. Kevin has learned a great deal from his personal experience with ADD/HD, and he works to expand the understanding of this gift. Dr. Kevin works with ADD/HD on many fronts, and has years of experience finding solutions. He has led children and parent groups to better understand and self-manage their ADD/HD gifts, and taught Continuing Educational Credit Courses for teachers and counselors. Dr. Kevin has also worked with adults in areas of their personal and professional life and development, bringing his experience to help them make the best of their potential. Through his Synergetic Catalyst work, he and his team also specialize in helping ADD/HD business owners and key personnel achieve their professional potential.

*His groundbreaking book *Managing the Gift: Alternative Approaches for Attention Deficit Disorder* introduced the idea of ADD/HD as an evolutionary process, not a disability, in 2000. Dr. Kevin continues to spread his message around the world as a best selling author, Catalyst, teacher, and speaker. Dr. Kevin has numerous books, CD/DVD's, and an APP out on ADD/HD. His other books include *Empowering Your Journey to Greatness* and *Five Tips to Synergizing Your Business*. He also has a number of books, DVD's and CD's out in the area of spiritual and personal development. He currently is on faculty at CEOSPACE teaching MBA level classes to growing and emerging entrepreneurs and just founded a non-profit; *Web Of Light Foundation (WOLF)*, to help create leaders of the pack.*

Dr Kevin has been referred to as the most practical, pragmatic spiritual person you have ever met and the most spiritual business person you have ever met. His ADHD unquenchable thirst for knowledge and experience helps him bring diverse perspectives, tools and skill sets to the plate. Besides bringing many things to the plate he has been called many things, along the way and many of those are incorporated right at the top of this page, just remember when you work with Dr Kevin, you don't get part of him, but all of him.
